Leading Water Solution Provider

PAPF is a leading supplier and solutions provider for swimming pools, decorative fountains, water treatment systems, and sewage treatment plants.

With a strong presence in the United States and a portfolio of international supply and consultancy projects, PAPF delivers high-quality equipment, design support, and technical services.

Global Water Solutions Leader

Delivering premium equipment and services for pools, fountains, water treatment systems worldwide.

01

03

Quality Products

Advanced filtration systems, energy-efficient pumps, LED lighting and waterer treatment technologies.

02

04

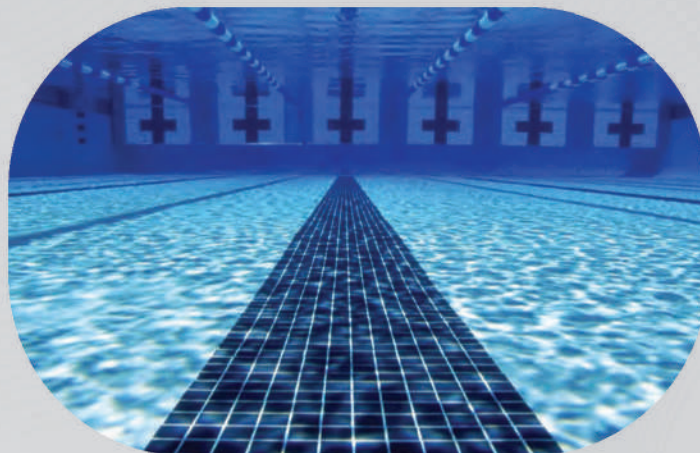

Comprehensive Services

Technical support, design consultancy, project supervision and equipment supply for diverse water applications.

Technical Expertise

Degreed engineers provide specialized product selection advice and innovative solutions for client requirements.

Lobar Reach

Technical Support Network

Certified professionals provide immediate solutions through global representative offices

Head Quarter in Tampa

Strategic Florida location with worldwide offices serving global clientele needs.

Adaptable Solutions

Products and services customized for regional requirements and international standards

International Projects

Portfolio spans Middle East, Asia and Americas with diverse water treatment solutions

Mission and Propositions

Global Leadership

Maintaining Industry leadership through high-quality water solutions and innovative product.

Quality Standards

Setting benchmarks with innovative products and exceptional customer service worldwide.

Client Trust

Becoming trusted provider meeting client needs through people and partner synergy.

Worldwide Reach

Headquartered in Tampa with global offices serving changing needs of international clientele.

Swimming Pool Equipment

Premium Filtration Solutions

Advanced sand filters and regeneration filters deliver crystal clear water with superior performance.

LED Underwater Lighting

Energy-efficient lights with brilliant colors and 25,000 hours lifespan for pools and fountain.

Energy-Saving Pumps

Variable speed technology reduces costs while providing optimal water circulation for all applications.

Complete Product Range

Comprehensive selection includes pumps, filters, lighting, heating systems and water treatment solutions.

Water Treatment Systems

1

Advanced Filtration Solutions

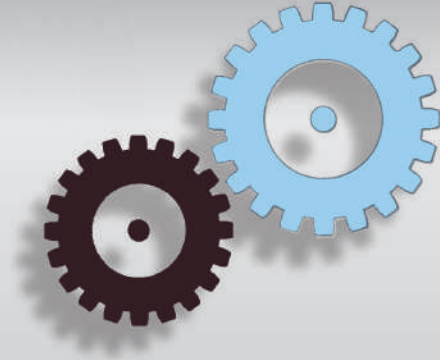

RO, UV disinfection, sand filters, and manganese removal units for crystal clear water.

2

Technical Support

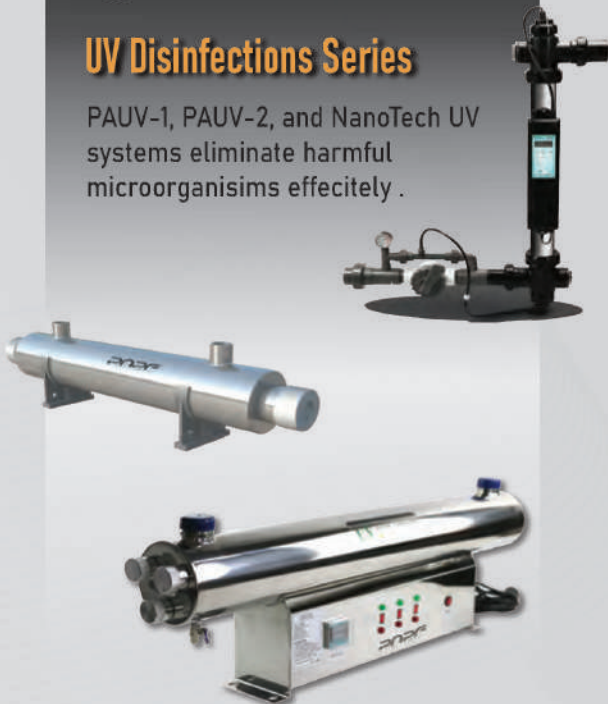

Certified professionals provide immediate solutions for all water treatment inquiries.

3

UV Disinfections Series

PAUV-1, PAUV-2, and NanoTech UV systems eliminate harmful microorganisms effectively.

4

Chemical Control

Paptrol Controllers, and PAMPV solenoid metering pumps ensure precise chemical balance.

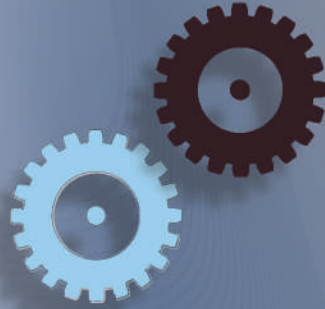

Technical Support

01

Technical Support

Certified professionals provide immediate solutions for all water treatment inquiries.

02

One-Stop Advice

Comprehensive support from product selection to quality management and development.

03

Reliable Solutions

Immediate technical assistance ensures clients receive proper support when needed.

**PRIORITY**

04

Customer Priority

We understand the importance of right technical support for our clients success.

Filters and pumps

01

Superior Filtration Solutions

Purifo Series and Regenerative filters deliver crystal clear water with innovative technology and exceptional performance.

02

Energy-Saving Pumps

AquaVario Variable speed pumps utilize permanent magnet motor technology for maximum efficiency and reduced maintenance costs.

03

Comprehensive Product Range

Multi filter types and pump models available to meet diverse residential and commercial pool requirements.

04

Technical Support

Expert assistance for product selection, installation guidance, and maintenance from certified professionals.

 **LED Underwater Lighting****Energy-saving brilliance**

LED panels deliver vibrant colors with 100% waterproofing and overheat protection.

01

Long-lasting performance

25,000 hours lifetime ensures reliable illumination for pools, spas and fountains.

02

04

Versatile applications

Perfect for pools, spas, fountains and water features requiring brilliant underwater illumination.

03

Multiple series available

PA4XA, PA6XA, PA12XA models offer various sizes for different applications.

Water Feature Equipment

01

Fountain Nozzles

Various nozzle designs for creating different water effects in decorative fountains

02

Underwater Lighting

LED lighting solutions that enhance fountain displays with vibrant illumination effects.

03

Control Systems

DMX controllers for synchronizing water movements with music and light shows.

04

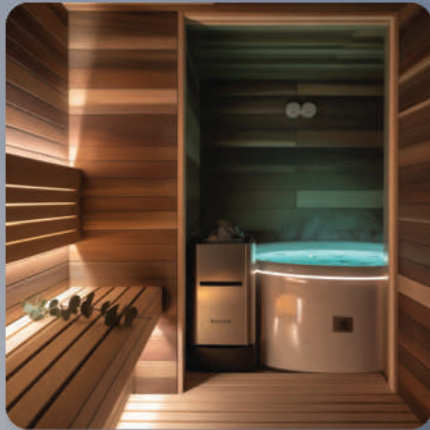

Filtration Systems

Specialized equipment maintaining water clarity and quality in fountain features.

Spa, Sauna, Steam, Turkish bath

Purl Aquatics is a leading innovator in the wellness industry, offering cutting-edge spa products, custom sauna rooms, advanced steam generators, and elegant Jacuzzis. We combine superior craftsmanship with modern technology to deliver products that elevate well-being and transform spaces into world-class retreats.

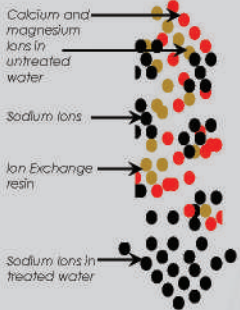

Purl Aquatics Steam Generators are a source of well being and relaxation. It has easy care structure, large water container which creates essential elements of a home and spa's. The touch-screen control panel of the steam generator allows to add the atmosphere easily with the help of lightening and fragrances.

Water Treatment

In ion exchange, hard water ions replace sodium ions on the beads, and then are flushed away during regeneration.

3. Water Softeners (Ion Exchange)

Removes calcium & magnesium hardness, Uses sodium or potassium ions for exchange, Prevents scaling in pipes and equipment, Requires periodic salt regeneration.

4. Reverse Osmosis (RO) Systems

Removes dissolved salts & heavy metals, Removes fluoride & nitrates, Requires effective pre-filtration, Produces reject water (brine).

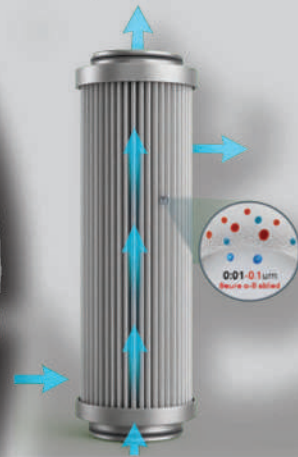

2. Activated Carbon Filters

Removes chlorine, VOCs, & pesticides, Improves water taste and odor, Used in both POE (Entry) and POU (Use) systems, Works by adsorption principle.

5. Ultrafiltration (UF) Systems

Removes bacteria & viruses effectively, Removes fine suspended solids, Membrane pore size: 0.01 – 0.1 micron, Often used as pre-treatment for RO.

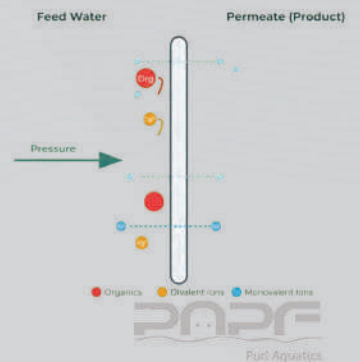

1. Sand Filters

First treatment step in the train, Removes suspended solids & turbidity, Uses graded sand or multimedia layers, Protects downstream sensitive equipment.

6. Nanofiltration (NF) Units

Removes divalent ions (e.g., sulfates), Provides partial hardness removal, Effectively removes organics & color, Operates at lower pressure than RO.

▶ Waste Water Treatment Solution

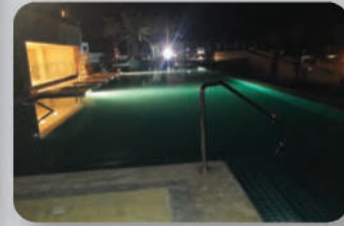

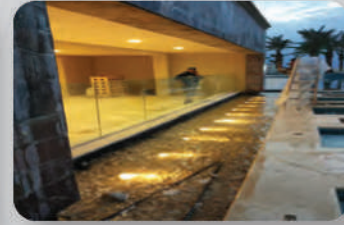

**MBBR, SBR,
Activated Sludge Process,
packaged STPs,
sludge handling equipment**

PAPF Submersible Mixer is one of the key equipment in water treatment process. In the process of water treatment, biochemical process can meet the requirements of process flow in solid liquid two-phase flow and uniform solid liquid-liquid flow. It is composed of submersible motor, impeller and installation system.
